A few lectures were vast and were not exam oriented

The sessions were really enlightening & helpful but time management could have been better... Thank you so much

Some lectures can be more condensed and time management could have been better.

The session was enlightening but time management could have been better.

Panel discussion could've had more interesting topics. Overall the program was very helpful and has increased our confidence to tackle the upcoming exams

It was a very well arranged program however more time constraints and little more clarity on answer writing in relation to the different marks pattern could be adapted.

Please do share the ppts , it would be really helpful. Because becuz what we have heard it would be easy to read.

It could have extended for few more days so to cove entire course briefly

This kind of perio revision session should be conducted twice a year ie., in the beginning of the year and other one before the exam.

This was overall a good programme thank you BAP and KLE. If this programme included second years also it will be good for them

1. We were not aware of this event..I think it will be better if if this is addressed....2. we need a detailed revision over a period of one week would be better.

Great

Please include good seating chairs as they were very uncomfortable (Kids chair)

The presentation materials should have been given for each day at the end of the very same day so that we could go back and brush through those topics on the same day

Overall excellent program

It would be great if we can get the pdf of the presentations for further reference

It would be better if it included more topics, jist of recent advancements..

Presentation only relevant to the topics can be presented next time.

Panel discussions could be better. More related to practical problem solving. And some speakers with a better communication skills
